Class 14a – ASSIGNMENT 18

ARRAY SIMPLE LOOP (SIMPLE LOOP)

Please do the Java program that will solve this problem:

- ✓ We want to create <u>TWO</u> arrays that contains N elements
- ✓ Ask the user how many elements for both arrays
- ✓ Create the two arrays
- ✓ Ask to input the value of each element of array number 1
- ✓ Multiply by 2 each element of array1 into array2
- ✓ Finally, create a display as shown below

How the program should interact with the user:

```
How many elements?        3

Enter value of element1?   10
Enter value of element2?   20
Enter value of element3?   30

FINAL RESULT:
Array 1:   10 20 30
Array 2:   20 40 60
Addition: 30 60 90

End of our program
```
